Joshua Miller

Full Stack Software Engineer
Houston, TX, millerjoshua737@gmail.com

Professional summary

Full Stack Software Engineer with 5+ years of experience and a track record of creating exceptional projects, driving change, and solving complex code problems. Proficient in a diverse range of technologies including JavaScript, Node, MongoDB, React, and more. Adept at providing educational instruction and hands-on development, demonstrating a strong commitment to collaboration and innovation.

Employment history

Lead Software Engineering Instructor, Mar 2022 - Jan 2025
Per Scholas, Remote

- Maintained a graduation rate of 85% by fostering a supportive and engaging learning environment.
- Focusing on MongoDB, Express, React, and Node.js technologies
- Successfully led and graduated 10+ cohorts, each consisting of 30+ students, totaling over 300 learners.
- Managed Salesforce database, handling data of 200+ users, ensuring seamless data retrieval and updates with 99.9% uptime.

Senior Instructional Associate, Jun 2021 - Jan 2025
General Assembly, Remote

- Partnered with a multidisciplinary instructional team to create a supportive, engaging, and productive remote learning environment tailored to open-ended educational settings.
- Increased learner engagement by 25% through the implementation of interactive teaching methods, real-time feedback, and personalized support strategies.

Junior MicroServices Engineer, Dec 2021 - Dec 2022
Seventh Ave., Remote

- Contributed significantly to securing a second bridge round, raising $3.5 million for the Venture Capital backed start-up.
- Developed code to deliver and enhance a positive user experience for over 22,000+ users.
- Led the development efforts in seamlessly integrating a cutting-edge Event Bus model, known as Event Vans, to enhance system communication efficiency.
- Made significant contributions to backend development for a high-profile "Pullupon.me" Seventh Ave. application, akin to Link-tree, showcasing strong technical prowess and innovative problem-solving skills.

Full Stack Engineer, Dec 2021 - Jun 2022
Olympus Code , Remote

- Played a pivotal role in developing **FOMO**, an event finder app, contributing to a 30% reduction in user search time through intuitive interface design and optimized search functionality.
- Applied innovative problem-solving skills to address technical challenges, reducing bug resolution time by 40%.
- Enhanced user experience by 50% by implementing user-centric design principles, resulting in increased app engagement and positive feedback.

Paid Software Engineering Intern, Jun 2021 - Dec 2021
Seventh Ave., Remote

- Made significant contributions to the development of critical application features, including the main feed and a Q&A segment, enhancing user engagement by 40%.
- Recognized for exceptional performance during an internship, leading to a rapid promotion to **Junior MicroServices Engineer** within three months.
- Played a key role in designing and optimizing micro-services architecture, improving system scalability and reducing latency by 25%.

Education

Software Engineering Certificate, Oct 2020 - Apr 2021
General Assembly, Remote

Capstone Project - API-GO is a complete and user-friendly package specifically created to help developers easily start projects that involve integrating third-party APIs.

Some College, Aug 2018 - Jun 2020
Lone Star College, Kingwood, TX
